Office Seating

KAB Seating, part of the CVG Group, with a Global footprint of subsidiaries is one of the largest producers of vehicle seats, manufacturing products for the toughest markets, environments and applications. Markets such as trucks, agriculture and construction create the need for seats with comfort and durability for extensive periods of time for the user.

These seat characteristics are the core of the construction of the KAB Office Range, providing the same level of comfort, centric to the criteria laid out by workplace safety bodies. Essential to users in office and 24/7 environments is posture control, avoiding back pain and stiffness caused by poorly designed and constructed seating often seen.

With KAB Office seats providing numerous design and features for a variety of user-applications across many business functions, there will be a KAB seat ideal for you and your workforce.

This publication will provide you with the background to make a considered choice of the right seat for the right application.....

Backdrop

With huge knowledge of seating over 50 years, KAB have the backdrop to provide the best products in the market. Designing from concept, development to testing and ultimately manufacture in our UK plant, we possess the tools to supply the ultimate seating product.

We ***understand*** seating..... design, manufacture, quality and ultimately comfort..... the features customers desire in their work environment in order to be efficient and productive.

Office seating has come a long way!

Range Summary

- **Navigator** | Entry-level seat for general office usage offering multi-adjustments for backrest, armrest, height, tilt and lumbar
- **Controller** | 24-hour seat, primarily for control rooms and surveillance centres plus high-end office applications. Available in fabric and fabric/ leather combinations
- **Director** | Director represents our most popular model and a versatile option across many applications across workstations, control rooms and suitable for all office personnel
- **K4** | Modern and ergonomic styling, plus extra features for cushion height/ length adjustment make this seat a great choice for true comfort and personalisation
- **Executive** | As the name suggests, a seat that is aimed at senior personnel and features a wide base cushion with great comfort for larger users
- **Executive ACS** | The superior choice for comfort and features, electronically adjustable for back, lumbar and cushion along with KAB's standard features
